

Do you have questions about the New Energy Code and the impact it will have in your community? Questions on Green Building and what it means to adopt a Green Building Code?

The New York State Energy Research & Development Authority is making consultation services about the recently adopted Energy Conservation Construction Code 2010 and more advanced energy codes available free of charge! Whether you are a town supervisor, mayor, director of planning and zoning, or other municipal official, it is important for you to understand the benefits of energy efficient buildings for your community and the pros and cons of adopting even more advanced codes. Learn what other communities

across the country and within NYS are doing regarding advanced energy codes such as ENERGY STAR or a green building program and why they decided to adopt a more stringent local code!

Newport Ventures, an energy consulting firm in Schenectady, NY is available to come to your jurisdiction for a presentation and informal roundtable discussion about potential advantages of advanced energy codes and how they can save your constituents and your community money. Take advantage of this unique opportunity and contact us today to schedule.
